Shape Code Test/Reflection/Evaluation

Name of person who created the code:

Name of evaluator:

1. Were the directions ambiguous? If so how?

2. Was the code easy to follow?

3. Were you successful in creating the picture given the code you followed?

4. Using design thinking, how could the creator refine their code to make it better? Where can you "debug" errors?

5. Any other information you can provide to the creator of the code as they refine their directions?
